RE: Convention booking of *MechCorps Entertainment*

To whom it may concern,

This letter is our official recommendation to include the ***BattleTech Simulator Pods*** offered by ***MechCorps Entertainment*** as part of your convention or event.

Not only are the *BattleTech* Simulator Pods of immense interest to convention attendees, but *MechCorps Entertainment* is also a reliable and professional organization that presents their *BattleTech* Simulator Pod experience in a very classy way.

For our fourth **MechaCon™** convention event on the weekend of August 1-3, 2008 we took a chance by offering a full third of our Electronic Gaming Room to *MechCorps Entertainment*. Not only were we not disappointed, but their setup was very impressive, to say the least. Our attendees' interest in the pods far exceeded our expectations. Due to the extraordinary success of presenting the four *BattleTech* Simulator Pods, we have invited *MechCorps Entertainment* to return to *MechaCon* again in 2009. We were so impressed, in fact, that we are dedicating a solid **half** of our Electronic Gaming Room to *MechCorps* this year so they can present *six* pods to our attendees.

It is my sincerest hope that this letter of recommendation provides reassurance to convention and event organizers that *MechCorps Entertainment's BattleTech Simulator Pods* are a fantastic addition to any event. It is also important to note that *MechCorps Entertainment's* staff makes every attempt to reduce the amount of stress for organizers and event staff by being practically self-sufficient. It has been my experience that the *BattleTech* Simulator Pods require no attention on the part of myself or *MechaCon's* convention staff as *MechCorps Entertainment* runs a very tight ship from the moment our event opens until the moment it closes.

Please consider adding *MechCorps Entertainment* to your own event roster, as their *BattleTech* Simulator Pods will be of interest to your attendees as well as attract higher attendee numbers.

Sincerest regards,

Jon Russo
